## TEACHING NOTES

Print the card set that works best for your students! The red border includes counting numbers to 10, and green set helps students to practice number words to 10. The same recording sheet is used for both sets, so you could even differentiate by having students find different cards.

Using this resource:

There are a couple of ways to use this resource- and probably some I haven't thought of yet!

1. Print the cards and hang them around the room. Students then use clipboards and go on a sort of scavenger hunt to find the cards. Then they write the equation and solution next to the matching picture on their recording sheet. This is my favorite way to use the resource since the kids are up and moving!

2. Place the sets of cards at a center table. Students choose a card, write the equation and solve. Then they choose another card.

Sometimes when students have finished, since they finish at different times, I have them turn their paper over and draw another picture or way to represent one of the numbers.
