SPACE

The image displays four distinct worksheets designed for children's space-themed learning activities.

- Space Facts:** This worksheet features two line drawings of astronauts in spacesuits. Between them is the title "Space Facts" and a line for the student's name, "By: _____". To the right of the astronauts are several horizontal lines for writing facts.
- Compare!:** This worksheet includes a Venn diagram with two overlapping circles for comparing two planets. Above the diagram is the title "Compare!" and the instruction "I can compare two planets." A small rocket is at the bottom left, and a smiling star is at the top right.
- What Do You Think?:** This worksheet asks the question "What Do You Think? Which planet do you think is most interesting?" next to a circle representing a planet. Below the question are several horizontal lines for writing. A rocket is illustrated at the bottom left.
- ABC Order:** This worksheet has a "Word Bank" listing the planets in alphabetical order: Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune. Below the list are two astronauts and a rocket. To the right of the word bank are several horizontal lines for writing. A smiling star is at the top right, and an alphabet line (a-z) is at the bottom.
