HOW TO DYE EGGS

Teaching Notes

Vocabulary Cards: Choose the vocabulary cards that work best for your students! These words can be used for this how-to writing activity, or for other writing activities relating to dyeing eggs..

These cards can also be cut apart from the picture to match the picture to the word!

Sequencing:

I have included several differentiated resources for sequencing.

- * 4 step large color cards with word cards to sequence and if you'd like, match the word to the step. This is great for young learners, or as a warm up for the writing activity.

- * 4 step cut and glue sequencing. You will see that on one sheet the directions say to cut and glue, and the other says to draw and write. You can even differentiate by having some students draw and write and having other students use the sequencing pictures.

- * Step by step writing booklet- This is another great sequencing option if you'd like students to go into more detail. There is a cover, pages with the step numbers on top, or you can just add as many blank pages to your booklet as you'd like! Print, Staple, and cut in half to make two student booklets.

- * Extra- Written response- This is a great follow up activity for students to do after they have practiced sequencing. It is also a great time for them to apply relevant vocabulary!

- * Extra- Decorate & Describe

- * Note there are 2 versions of the 2 step process depending on whether you'd like to include the boiling step or the coloring on the egg step.

You can use these cut and glue pieces, but if you'd like to include additional steps, or painting the eggs, then the booklet may be the right choice for you!
